White at SGCC three days prior to the meeting, Phone: 519-336-2201

NOTE: All Members and Guests are requested to reserve in advance.

Presentation

September Speaker

Presenter:

Andrew Barco has the position of Product Manager for Weidmueller Network Connectivity products for North America. Andrew has been an ISA member since 2008. Andrew has been working in industrial automation for over 13 years as product Manager in the Application, design and field support in the installation of wireless and ethernet systems.

Abstract: In Refining & Process industries, over 90% of the Control & Shutdown Valves and some other critical measuring & control instrumentation are pneumatically operated. All these critical instrumentation depends on quality of Instrument Air for safe & reliable operation. Instrument air is often wrongly assumed to be a cheap or even 'free' source of power. In fact, it can be 10 times as expensive as electricity by the time all generation, transmission, treatment and system costs are taken into account. Good air preparation must therefore be considered for safe, efficient & reliable operation of process plants. The intent of this presentation is to offer guidance on the correct, economic and safe treatment of compressed air in industrial applications.

NOTICES

Remember to renew your membership!... ISA Sarnia Section members who join or renew their memberships are entered in a draw for a free book.

If you wish to use the Sarnia ISA, you can contact the ISA Web master at sarniaisa@gmail.com

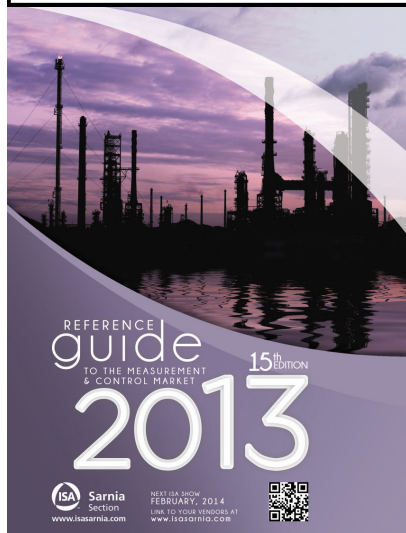

Have you renewed your membership. You may have received a notice stating your membership is due or you are in the grace period. **DON'T LET YOUR MEMBERSHIP LAPSE**
YOU BECOME THE LOOSER AND YOU NEED TO RE-APPLY. Do you really need This HASSLE!

2013 Reference Guide can be pick up at the following locations:

Pick-up in Sarnia at: *Lakeside Controls*, 581 Vidal St. S.
Wika, 1355 Confederation St.
Provincial Controls, 864 Philips St. E.

President's Message

I welcome all to our sixty-sixth year of our Sections history. As you all know we became a Section in September 1947 and here we are still seeking new members and Executive positions. It is hard to believe that through all of that time we remain as loyal as the first day we were formulated as a Section. Our goals haven't changed and our way of doing business still stands the test of time itself.

Our key to our success still as always is you our Section members. All of you with your dedication, common interests and belief in our field of expertise are what it takes. Instrumentation is still what it is all about. We add the new buzz word Automation but we all know that the working instruments measuring the appropriate variables are what make a good automated system. It has provided a good livelihood for all of our members and will continue to do so.

It is my pleasure to be your President for another term. I am hoping for a quiet low key year. We will re-establish and review our business side of the section so that we may maintain our future. We have a dedicated Executive as you know and we are always looking for assistance. If you have spare time and a keen interest in your Instrumentation career you should be part of us. If you have any ideas for topics for speakers to assist our Program Chair Phil Luppke fill the dinner meetings step up and let us know.

Also a note about ISA if you are not aware ISA is looking at changing its structure. There is a "New Governance Proposal" out for review and will be voted on at this year's Council of Society Delegates meeting in Nashville in the fall. Rob Dickson our delegate will be carrying our vote if you have any comments please let us know. Also note that ISA is putting a lot of dollars into upgrading our Web Presence to move forward into the future.

Looking forward to a good year. As always any comments or concerns please let your Executive know. Remember any unspoken ideas or concerns are just lost thoughts rambling around creating stress and dissension.

Thank you
ISA Sarnia Section President
Mike Murray
