PLANNING YOUR INVESTMENTS FOR THE FUTURE.

On November 25th, 1985 the Sarnia Section, held their second dinner meeting of the 1985/6 season. This meeting was the best attended this year. Our speaker was Mr. David Petersen from the Dept. of Weights & Measures in Toronto. Mr. Philip McHugh the Dept. manager from London office assisted Mr. Petersen in answering questions from the floor. The responsibilities of these two men are to enforce regulatory measures and certification of metering used for trade purposes. Many members seem to feel that the Dept. of Weights & Measures may not be keeping up with the latest Technological developments in the metering world. We were very happy to welcome these two gentlemen to Sarnia on behalf of the Sarnia I.S.A. chapter.

THE FOLLOWING IS A LIST OF NEW MEMBERS/UPGRADED

MEMBERS WHO WILL BE PRESENTED WITH THEIR MEMBERSHIP

MEETING NOTICE

The third I.S.A. dinner meeting for 1985/1986 will be held on Tuesday, January 28, 1986 at the Sarnia Golf and Curling Club, Christina Street at Errol Road. The cocktail hour will commence at 6:00 p.m., followed by dinner at 7:00 p.m.

The after dinner speaker will be Mr. Umed Dugar, Senior Engineer of Petrosar Ltd., Corunna, Ontario. His talk is titled, "The Retrofitting of a Conventional Based Control System to the Modern Micro Based Controls". Mr. Dugar has experience in retrofitting an Upgrade Iron Ore Concentrating and Pelletizing plant, but will be concentrating on a similar project, presently underway at Petrosar Ltd.

Please contact anyone of the following, before Thursday, January 23, 1986, if you plan to attend:

Our line of patent (pending) portable and/or hard-wired power cleaning equipment is designed to protect computers, micro-processors and computerized industrial equipment against the damaging effects of power fluctuations which can cause data processing errors, computer memory loss and program skips or wipeouts.

Unity power Systems Transient Protectors remove the unwanted transient/surge/spike activity in both directions, high frequency noise, harmonic distortion and other related power problems.

INSTRUMENT HOUSINGS

Thermon's selection of fully engineered instrument housings provides exceptional thermal and mechanical protection for a wide variety of industrial pneumatic and electronic process instruments. These high density, UV resistant polyurethane enclosures are available with complete mounting and installation accessories, including steam, fluid and Division 1 electric heaters.

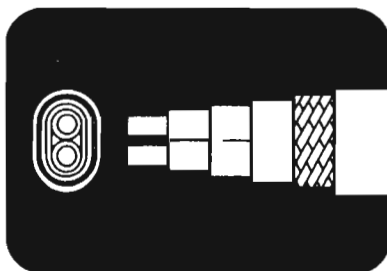

SELF-LIMITING HEAT TRACING

Thermon TSX™ is the first field fabricated, carbon matrix heater continuously rated to 190°C, suitable for pipe freeze protection and temperature maintenance applications. TSX will not overheat, has a low inrush current factor, withstands steam purging and can be installed in ordinary and hazardous areas.

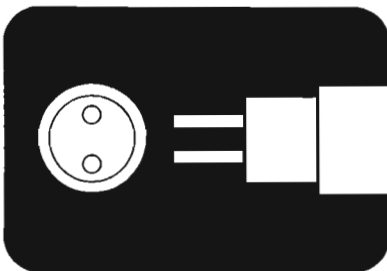

CONSTANT POWER DENSITY TRACERS

Thermon CPD™, constant power density electric heating cable for pipe tracing applications in ordinary and classified areas. CPD has a series of independent thermal zones to produce an even and uniform heat output. This electric tracer has zero inrush at start-up, uses standard line voltages, is easily monitored and is rated to 200°C exposure temperatures.

HIGH TEMPERATURE MI CABLES

Thermon Heatrace™ MI factory fabricated tracing cable for process temperature exposure to 500°C. The high nickel alloy sheath provides excellent immunity to hostile environments and chloride attack. Thermon MI heater sets are 600V rated and CSA approved in ordinary, Class I — Division 1 and 2 (hazardous) locations.
