## RELIABLE PROCESS INDICATORS FOR EXPLOSIVE, DUSTY or WASHDOWN AREAS

The loop powered V560 process indicator is ideal for use in chemical plants, refineries and other locations where local, point of process indication is needed.

All models operate from 4-20 mA or 10-50 mA current loops and give you wide ranging zero/span displays in any engineering units. A 1" LCD with selectable dead zero ensures easy readability even in bright sunlight:

Housings available:

- Explosion proof housing for operation in Class 1, Div. 1 & 2 hazardous locations
- Splash resistant NEMA 4X housing for reliable operation in hosedown & chemical spill areas

CSA APPROVED Tel: (519) 332-2433 • Fax: (519) 332-4707

## 33RD ANNUAL POWER INSTRUMENT SYMPOSIUM

presented by

Instrument Society of America  
Power Industry Division

May 21-23, 1990

Toronto, Ontario Canada  
Technology of the 90's

Host Chairman  
Roy Frazier, Humber College  
56 Queen Elizabeth Blvd.  
Toronto, Ontario  
M8Z 1M1  
416-252-9441

### Intermediate to Senior Sales Secretary

**Westech** is a distributor of instrumentation to Canada's process industries. Our new Sarnia facility has an immediate opening for a Sales Secretary.

The successful candidate will have experience with an instrument company, or with Sarnia's process industries. They will have above average secretarial and communication skills, as well as being competent with Word Perfect 5.0.

**Westech** offers an attractive salary and benefits package. If you're looking for a new challenge within a successful and professional organization, please provide your resume to:

**Westech Industrial Ltd.**  
Unit 1A  
1184 Mitchener Street  
Sarnia, Ontario  
N7S 4B1  
Attn: Mr. Jeff Evans

# **INFORMATION RELEASE**

February 7, 1990

## **CANTECH EXPANDS TORONTO BRANCH**

Toronto Branch of Cantech Corporation has moved to new premises to provide space for expanded sales force, larger warehouse and improved service facilities.

This expansion strengthens Cantech's National coverage and reflects their commitment to support the Ontario market.

Cantech is the exclusive distributor for Neotronics gas monitors in Canada. The new Toronto service centre will provide fast turnaround for calibration of portable gas monitors.

The Toronto service centre will also provide oxygen cleaning and valve set-up and repair for Anderson Greenwood safety relief valves. Cantech is the exclusive distributor in Canada.

For more information and a tour of our new branch office, contact:

## **Instrument Society of America**

*SARNIA SECTION*

The Third Dinner Meeting of the year was held on January 29, 1990 at the Sarnia Golf and Curling Club.

Guest Speaker - Stan Weiss, Past President ISA International, gave us an interesting insight into the rewarding experiences, education and intercontacts of ISA's "Top Post". He also cautioned future candidates on the tremendous drain of personal and professional time.

Guest Speaker - Malcolm Quinn, District 13 Vice-President presented two extremely interesting Videos from ISA - Triangle Park on careers in instrumentation, training aids and "free publications" from ISA.

Time ran out for a more in-depth look at Sections, Districts and Divisions, so we'll be having Malcolm back at a future meeting to complete these areas.

## Instrument Society of America

*SARNIA SECTION*

The Fourth Dinner Meeting is to be held March 26, 1990 at the Sarnia Golf & Curling Club.

GUEST SPEAKER: John Barclay  
Atomic Energy of Canada Limited

TOPIC: Description of the engineering basis of the 10MW SLOWPOKE ENERGY SYSTEM (SES-10), being considered by the University of Saskatchewan.

John will outline some key design principles, equipment, and explain hot water heating systems, based on the SES-10.

Guys and Gals, thanks for your tremendous support re: phoning in your dinner reservations - KEEP IT UP - as we're heading for "STEAK" this time.

For Reservations please call:

Willer Engineering (Maureen) 336-3006  
Provincial Controls (Gayle) 336-7301

Cocktails @ 6:00 p.m.

Dinner @ 7:00 p.m.

Member: \$7.00

Students: \$5.00

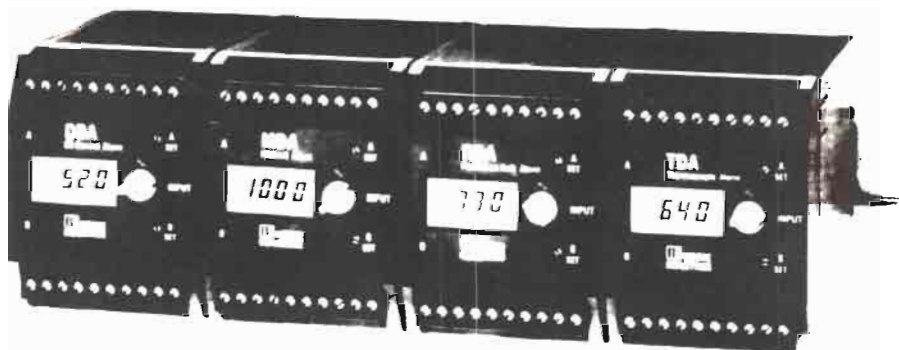

Non-members: \$12.00

SPECIAL AWARD:

Brian Smith of Nova Petrochemicals - Corunna Site, has received an honorarium for his paper and oral presentation on "Application of a PSFC Analyzer to Measure VGO Boiling Points", at the 1989 Philadelphia ISA Conference & Exhibit. Brian will be presented with his plaque at the March Dinner Meeting.

**Innovations...**

# New Compact Alarms are Simple to Set and Monitor

Take a look at our new DIN-style alarm trips! These are the feature-packed alarms you need to monitor current, voltage, thermocouple and RTD signals.

#### Front Panel Indicators

For starters, their **front panel digital indicators** display trip point settings and the input signal, making them easy to set and monitor. They also have bright front-panel LEDs that indicate an alarm condition.

#### Safe, Reliable Performance

Accurate signals are ensured by the combination of **RFI/EMI** protection that filters out interference and **complete isolation** that prevents ground loop effects. With the **Intrinsic Safety** option, you can connect the alarms directly to sensors in hazardous areas without using safety barriers.

#### Compact, Rail-Mount Housing

Our new alarms won't crowd your control room because the housings fit closely together. Plus, you can install them without using tools or mounting brackets—just snap them on a standard DIN-rail.

Innovative designs like these are the result of Moore Industries' commitment to providing you with high-performance process instrumentation. Our complete product line includes:

- Signal Transmitters
- Temperature Transmitters
- Isolators and Converters
- Power Supplies
- Alarm Trips
- Indicators and Displays
- Power Transducers
- Integrators and Totalizers
- Communication Modules

PROJECT #TX639B - INSTRUMENTATION AND CONTROLS ENGINEER

LONDON, ONTARIO

**THE COMPANY:**

- a Canadian consulting engineering firm owned by employee shareholders
- provides engineering planning and building design services to public and private clients; operating since 1945
- offices across Canada; major areas of operation include: Environmental Engineering, Transportation, Urban Development and Building Design
- Building Design group provides B.D. services to other operational areas and also sells the expertise to outside clients
- well known for competence in handling complex inter-disciplinary projects

**THE ROLE:**

- reports to the Head, Electrical Engineering Department
- the hiring of this individual represents a meaningful move into the I & C area for the company
- focus of activity will be on I & C for environmental projects, specifically Water and Wastewater Treatment facilities
- will also provide technical support to Building Design projects involving I & C
- capable of directing the work of technicians and drafters
- must be capable of delivering cost effective designs, on-time and within budget

**THE CANDIDATE:**

- P.Eng. preferred although an Engineering Technologist with strong technical skills and significant experience would also be considered
- minimum 3 years of broad I & C experience
- familiar with process instrumentation and PLC's
- preference for an individual with "hands on" design and plant experience; consulting engineering experience a definite asset
- knowledge of telecommunication and data networks, SCADA, energy management systems, and CAD desirable

**COMPENSATION:**

- commensurate with experience; full benefits; shareholder privileges (subject to performance); relocation

**CONTACT:**

- Cheryl Hiland, an Associate with Bryce, Haultain & Associates, Tel: (705) 944-5628; Fax: (705) 944-5600

## **CONTROLLER TUNING**

**“Controller Tuning and Control Loop Performance, a Primer”, by David W. St. Clair, published January 1990. This 37 page tutorial handily broke all records at the Du Pont Co. for number of requested copies (over 1200) when issued. It is written for the non-specialist. The explanation of basic principles is developed with minimum reference to technical concepts which only the more trained would have. For more information write Straight-Line Control Co., 3 Bridlebrook Lane, Newark, DE 19711. Single copies are \$10 (\$15 for moneyback guarantee). Quantity discounts are available.**

**SSCAN-GRODYNE  
CONTROLS**

**FOR ALL  
OF YOUR  
ANALYSIS,  
DETECTION &  
MONITORING  
NEEDS.**

**Our Mission:**

To provide quality "State of the Art" detection, measurement and control equipment, and systems to targeted industrial markets in order to protect and serve man in his environment.

**Our Markets:**

**ENVIRONMENTAL**

- Personal/Area Monitoring of Toxics and Combustibles
- Emissions/Stack Monitoring
- Water Quality Control

**PROCESS**

- Gases/Particulate Analysis
- Moisture Analysis
- Mass Flow/Velocity - Gas and Air
- On-Line Analysis

**LAB ANALYSIS**

- Particle Size Analysis
- Sulphur in Oil

**SSCAN INSTRUMENTS** is pleased to represent such prestigious manufacturers as:

Bacharach, Bayer Diagnostic, Draeger, Dupont, Eberline, Environment S.A., Honiba, Interscan, Kurabo, Kurz, Lasentec, MDA, Sieger, Summit Interests, Thunder Scientific.

## A NEW ERA IN TRANSDUCER PERFORMANCE

The GT 300 performs better in six very important ways:

#### Increased Vibration Resistance

Vibration can destroy expensive input transducers and controllers. Independent laboratory tests prove our heavily shock-tested, aluminum, die-cast, stainless steel GT 300s are an undistorted, accurate, dependable pressure gauge.

#### Variable Air Supply

Conventional high-flow (100-200 gpm) air flow supply pressure gauges have a fixed 100-200 psi (7 bar) full-scale range.

#### Fail-Safe Operation

If power to your input pressure can be shut down suddenly by means of an easily accessible adjustment, this gauge:

#### Unequaled Accuracy

The GT 300 is accurate to 2% full scale at 20 F. It features built-in feedback equalized input and output pressures, air controlled continuously, and voltage is adjusted regardless of wind speed, ambient temperature or supply pressure.

#### Wider Operating Temperature Range

Set the scale at any desired temperature; transducers on the market from a minimum of minus 40 F to plus 150 F.

#### Split-Range Operation and Field Reversibility

Flexibility is automatic; you can satisfy your special requirements exactly.

With the GT 300, Conflow has created the most advanced electronic current-to-pressure transducer you can buy. But it's also economical, costing just about what you'd pay for less sophisticated electromechanical equipment.

The GT 300—advanced design using leading edge solid-state technology, backed by Conflow's 40 year reputation for quality.

REPRESENTING

## NELES-JAMESBURY... NOW, YOUR BEST SINGLE SOURCE FOR CONTROL VALVES

Today's Neles-Jamesbury combining Neles, Jamesbury and Hammel Dahl adds new dimensions to your process control capability.

- **In-depth line of control valves.** Whether your control systems handle highly corrosive fluids, erosive slurries, or light gases at temperature/pressure extremes, Neles-Jamesbury can help you select the right, dependable, cost effective rotary and linear control valves for optimum process control.
- **Control valve innovations.** Neles-Jamesbury is the fastest growing, most innovative control valve company in the world. We've developed new rotary and linear control valves — like Sector-ball that provides optimum rangeability, precision positioning and rapid response. We've also designed low recovery Q-ball trims that solve problems associated with throttling high flows, cavitation and noise.
- **Your control valve partner.** Today our worldwide facilities, the millions of valve applications that have improved your process, and the problem solving expertise of our research, engineering, production, marketing and distribution people make the difference. Our people are the very reason Neles-Jamesbury has become the preferred supplier to a growing number of companies. A partner, in effect. Working with you to create opportunities, improve productivity and increase profits.

### Ball Control Valves

Broad range of polymeric or metal-seated ball valves meet control requirements in moderate-to-severe services. Featuring true equal percentage characteristic for outstanding throttling control, these valves provide the optimum in rangeability, positioning and response.

### Specifications

**Size Range:** 1/2" - 36"  
**Types:** ANSI Class 150, 300, 600 flanged and wafer, screwed end, socket and butt weld  
**Temperature Range:** -100°F to 1200°F  
**Materials:** Carbon steel, 316 stainless steel, Alloy 20, and other alloys

### Q-Trim

Q-Ball's perforated parallel plates in the ball flow opening stages the pressure drop; this gradual pressure reduction decreases velocities, noise generation, cavitation and erosion.

### Butterfly Control Valves

Wide range of polymeric or metal-seated butterfly valves are excellent general purpose control valves. With modified equal percentage characteristics, 60:1 rangeability, and high flow coefficients, these valves easily meet the requirements of most control applications.

### Specifications

**Size Range:** 3" - 60"  
**Types:** ANSI Class 150, 300, 600 wafer or lug  
**Temperature Range:** -320°F to 1100°F  
**Materials:** Ductile iron, carbon steel, 316 stainless steel, Alloy 20, and other alloys

### Globe Control Valves

Hammel Dahl's globe valves are exceptionally well-engineered valves that give excellent proportional control in a very wide range of process services, high pressures and temperature extremes.

**ANSI Class:** 125 to 2500  
**Size Range:** 1/2" - 16"  
**Types:** Top guided, stem guided, cage guided  
**Temperature Range:** -320°F to 1000°F  
**Materials:** Cast iron, carbon steel, 316 stainless steel, chrome-moly, and other alloys

For more information on our complete line of control valves and your local stocking Neles-Jamesbury distributor, just contact:

## NELES-JAMESBURY

# A MEASURE OF PRECISION

At Willer, precision goes beyond stocking and supplying leading edge process instrumentation and analysis systems and equipment. It means doing everything possible to make sure you get the right products to precisely match your needs.

To do it, we spend countless hours sourcing and evaluating instrument performance. So we gain the detailed knowledge to help us answer your toughest technical questions.

We keep you informed in other ways, too. We regularly issue technical bulletins and product information of all kinds. Because the more you know about process measurement, the better we can serve you. Call or fax for a copy of our current Product News Bulletin.

### PROCESS CONTROL ISSUE

#### MINIATURE VALVE SERIES

HOKE Controls Limited has introduced a new series of miniature valves. The valves are designed for use in a wide range of applications and are available in a variety of materials and configurations. The valves are compact and easy to install, making them ideal for use in tight spaces. The valves are also highly durable and can withstand high pressures and temperatures. For more information, contact HOKE Controls Limited at (416) 827-9807.

#### CONTROL PANELS

ISA Members can now purchase control panels from a wide range of manufacturers. The panels are designed for use in a variety of applications and are available in a variety of materials and configurations. The panels are compact and easy to install, making them ideal for use in tight spaces. The panels are also highly durable and can withstand high pressures and temperatures. For more information, contact ISA Members at (416) 481-6483.

#### VALVE SERIES

HOKE Controls Limited has introduced a new series of valves. The valves are designed for use in a wide range of applications and are available in a variety of materials and configurations. The valves are compact and easy to install, making them ideal for use in tight spaces. The valves are also highly durable and can withstand high pressures and temperatures. For more information, contact HOKE Controls Limited at (416) 827-9807.

#### MINIATURE NEEDLE VALVES

HOKE Controls Limited has introduced a new series of miniature needle valves. The valves are designed for use in a wide range of applications and are available in a variety of materials and configurations. The valves are compact and easy to install, making them ideal for use in tight spaces. The valves are also highly durable and can withstand high pressures and temperatures. For more information, contact HOKE Controls Limited at (416) 827-9807.

### **INSTRUMENT HOUSINGS**

Thermon's selection of fully engineered instrument housings provides exceptional thermal and mechanical protection for a wide variety of industrial pneumatic and electronic process instruments. These high density, UV resistant polyurethane enclosures are available with complete mounting and installation accessories, including steam, fluid and Division 1 electric heaters.

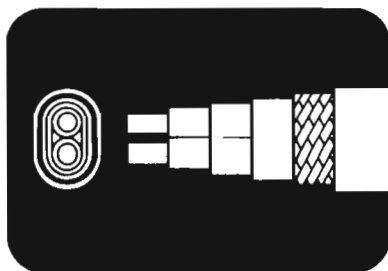

### **SELF-LIMITING HEAT TRACING**

Thermon TSX™ is the first field fabricated, carbon matrix heater continuously rated to 190°C, suitable for pipe freeze protection and temperature maintenance applications. TSX will not overheat, has a low inrush current factor, withstands steam purging and can be installed in ordinary and hazardous areas.

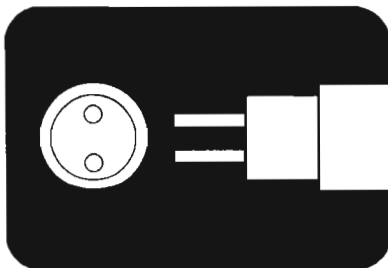

### **CONSTANT POWER DENSITY TRACERS**

Thermon CPD™, constant power density electric heating cable for pipe tracing applications in ordinary and classified areas. CPD has a series of independent thermal zones to produce an even and uniform heat output. This electric tracer has zero inrush at start-up, uses standard line voltages, is easily monitored and is rated to 200°C exposure temperatures.

### **HIGH TEMPERATURE MI CABLES**

Thermon Heatrace™ MI factory fabricated tracing cable for process temperature exposure to 500°C. The high nickel alloy sheath provides excellent immunity to hostile environments and chloride attack. Thermon MI heater sets are 600V rated and CSA approved in ordinary, Class I – Division 1 and 2 (hazardous) locations.
