PRESENTATION

Adam has over 14 years of experience in instrumentation with WIKA. He graduated from the Northern Alberta Institute of Technology (NAIT) with a diploma in Engineering Design and Drafting, specializing in machine design and started in the drafting department at WIKA.

After several years of working for WIKA Canada as a Product Manager he transferred to the CoE (Center of Excellence) for Electrical Temperature Measurement (ETM). In this current role he covers the Americas region supporting manufacturing and sales with engineered Electrical Temperature Measurement solutions. He also focuses on special applications for temperature measurement including tube skin and multipoint products globally.

NOTICES

PLEASE READ

The ISA Sarnia Section is kicking off its 2019 twenty first edition of the "Reference Guide to the Measurement & Control Market" issue. We are always looking for new 'Supplier Advertisements'. If you know of any new companies, vendors or interested parties that would benefit with a positive exposure experience that puts their advertisements into the users hands; then this is where they should invest their advertisement dollars.

Let anyone of our committee or executive know and we will contact Grafiks (contact info below) to ensure that they receive the contract package for review and to sign up with.

Thank you

ISA Sarnia Section Reference Guide Committee

2018 Reference Guide is available for distribution and can be picked up at the following locations:

Kevin Noon | Emerson | 581 Vidal St. South | 519.331.7679
Lakeside Process Controls | 581 Vidal St. South | 519.332.2300
Provincial Controls | 864 Phillips St. | 519.336.7301

For information about the Guide or to add your advertisement page, please contact:

Grafiks Marketing and Communication

PRESIDENT'S MESSAGE

Hi everyone;

Just wanted to pass on a few items on behalf of your executive as a prelude to the Christmas season and the end of the ISA fiscal year.

Having returned from the Fall Leader's Meeting in Montreal it should be known that your ISA Society is going through changes. It continues to strive to compete with other societies and organizations. The executive has completed changes in the Mission and Vision statements, making them more direct short and relevant. We have also rewritten our value statements. It seems that almost everyone is on board with change and we must look ahead to modify and alter what we need to change in order to fall in line with you our section members and vendors. We of course need your help in letting us know what works and what doesn't. Complacency is sometimes a double edged sword which may mean all is well or no one really pays attention and just floats with our choices. I always remember a quote that has always been passed on for years "If it ain't broke don't fix it". This of course doesn't quite fit anymore as we know it is broke. We still continue the struggle to find new members and therefore new executive members. It is

testament to all of you that have remained loyal and involved that we are able to maintain our Section.

One main item that came out of the Fall Meeting is that the dues increase of ten dollars U.S passed. If anyone of you has a membership that will come due soon you should jump on it and renew before the end of the year. For anyone thinking of a new membership now is a very good time.

This is our show year and we continue to bring you all that we can as a section executive. We do however always require your participation and we do look forward to it. Whether it be the member dinner meetings with various topics, the science fair, the golf tournament and the production of the Reference Guide. We are now looking into different places that we may set up tours and have section member participation so stay tuned. We all continue to strive to serve you our members. Remember our section is in its seventy-first year. Truly an awesome feat in today's world.

If you are not an ISA member yet I encourage you to join for there are many benefits that are afforded a member. Included are the standards and ISA specifications, ISA publications including the Intech magazine, the ISA website, seminars, training both web and classroom, industry networking and of course your local sections programs and events. The limit is only a personal limit. Many doors do open. Honors and awards are a big item for ISA also as it recognizes the individual and groups. Sign up and it will help enhance all that you are and wish to become in your field of expertise.

As always if you have any topic ideas for speakers please forward to our program chair. He can use any assistance in providing an interesting, current and enjoyable speaker to fill the dinner meetings, step up and let us know. We continue to strive for success and with all of your help we will get there.

As always any comments or concerns please let your Executive know. Remember any unspoken ideas or concerns are wasted thoughts unless we inform and act on them.

Thank you

Mike Murray
