PRESIDENT'S MESSAGE

Happy New Year Everyone;

As we embark on the remaining months of our 2019-2020 year we are still as always looking for new members, executives and committee assistance. It seems that they are an elusive target and we haven't found any would be members just mulling around looking for somewhere to join. We do still have a good compliment of Automation, Instrumentation and Instrumentation vendors and sales personnel in our industry and our area but not many seem to want to sign up. It is hard for us as an executive to fathom why when we have an active local ISA section in the area that more automation and instrumentation personnel would not wish to join us.

For all of the members that pay the full fee they have the standards and ISA specifications, ISA publications including the Intech magazine, the ISA website, seminars, training both web and classroom, industry networking and of course your local sections programs and events. The limit is only a personal limit. Many doors do open. Honors and awards are a big item for ISA also as it recognizes the individual and groups. Sign up and it will help enhance all that you are and wish to become in your

of expertise. Plus we have standards discount, publication discounts, and discounts at all ISA functions including section activities, training discounts and some benefits that are available in certain areas of the globe. If a member chooses not to partake in any of these then that is their choice but they are available and would offset the full membership fee. If you the present members are working with your peers ask them why they do not choose to join. Invite them out to the next member dinner meeting.

One main item this year is that our ISA Society will celebrate its 75th Anniversary. There will be a lot of information coming on the plans and highlights for the year. For us as a Section we will be celebrating our 73rd year, how awesome is that! When we think of these timelines in today's world they are truly remarkable anniversaries.

We have member dinner meetings with various topics, the science fair, the golf tournament and the production of the Reference Guide. We are now looking into different places that we may set up tours and have section member participation so stay tuned. We as an Executive all continue to strive to serve you our members. We of course continue to need your help in letting us know what is working and what isn't. Complacency is a trap.

Our ISA Sarnia Section Reference Guide to the Measurement and Control Market for 2020 is finally getting ready to go to print as we had some ISA forms coming out modified in the last hour. We also had vendors coming in at the last minute and then with modifications. if anyone knows of any new companies in our area or in Ontario please pass their names along to your Executive and we will ensure that someone will contact them.

As always if you have any topic ideas for speakers please forward to our program chair. He can use any assistance in providing an interesting, current and enjoyable speaker to fill the dinner meetings, step up and let us know. We continue to strive for success and with all of your help we will get there.

Any comments or concerns please let your Executive know. Remember any unspoken ideas or concerns are wasted thoughts unless we inform and act on them.
