Topic - Cybersecurity in the Modern World

. Considerations and discussion on Network and Cybersecurity. Today Cybersecurity is at the forefront as we adopt more modernized benefits of Digital Transformation and Industry 4.0.What and who are the threat factors today, and what regulations/guidance are there in the Canadian arena? It is important to understand the differences in Priorities and roles between IT and OT as these drives towards different solutions towards remediation.

We will look at critical infrastructure, and Priorities in the O+G and Chemical industries. How does modernization and asset management play a part into todays equation ?

PRESIDENT'S MESSAGE

ISA Sarnia President's Message – March 2024

Welcome everyone to our spring meeting. We are finally starting to see some sunshine. We continue to have some excellent dinner meetings with great topics and really good turn outs at the new venue. This month's topic is on Cyber Security, an important thing for all of us these days. Our Lambton College Student group is going strong and we look forward to supporting them at their competition coming up in the spring. Keep your calendars open for our May AGM as we have once again booked the Duke and it should be a great time.

I hope to see you March 25th for our dinner meeting, bring a friend and encourage them to join us.

Best Regards,

Dave Woodill
